

Contract Manufacturing

International Sourcing

Our wholly-owned sister company, NM Group Technologies (Suzhou) co.,ltd (NMGT) has extensive capabilities, including:

- Machining (Milling, Turning, Grinding)
- Heat Treat (Hardening, Annealing)
- Equipment Assembly
- Sourcing

NMGT's sole mission is to serve as a platform company supporting the products and activities of all its affiliates. As a result, its capabilities are available to us – and to you.

We are particularly proud of our quality control at NMGT. 100 % documented inspection is carried out from incoming to finished product. If your goal is to reduce product cost without quality risk, we can help you identify which components might be a good fit for Chinese supply, and integrate these components into your equipment without jeopardizing your reputation as a high-quality OEM.
